What is a 50kVA solar inverter? A 50kVA solar inverter is an intelligent and multifunctional power conversion and supply device which consists of a solar charge controller, a rectifier, and an inverter. It has multiple power point trackers, a wide input voltage range, an integrated data logger as well as RS485/Wi-Fi interface.

Can a 50kW solar array be put on an inverter? A 50kW solar array can be put with an inverter with an AC output of 37.5kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

How long does a 50kVA solar inverter last? The average payback period of UTL 50kVA solar inverter is 3 to 5 years. Within 3 to 5 years, you will get all your investment back through the savings. Is a 50kVA solar inverter suitable for my medium-size home?
