

ANNUAL STRATEGIC ANALYSIS AND DESIGN PLAN FOR ENERGY STORAGE INDUSTRY

What is the implementation plan for the development of new energy storage? In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Does the energy storage strategic plan address new policy actions? This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. ? 17232 (b) (5)).

What was the growth rate of energy storage industry in 2015? Driven by the Euramerican and Asia-Pacific market, worldwide energy storage industry experienced fast development in 2015. According to CNESA, global cumulative installed capacity of energy storage system was 946.8 MW (excluding PSS, CAES and heat storage) by the end of 2015 and the growth rate was 12.7% compared with year 2014.

What is the White Book for energy storage industry in 2014? White book for energy storage industry in 2014. China Energy Storage Alliance 2014. China Electricity Council. The study on the development policy of energy storage industry. China Power Enterprise Management 3; 2015. p. 24???28. Global energy storage distribution: the US accounts for 40% and Japan accounts for 39%.

Why should energy storage companies focus on industry disruptions? Maintain awareness and strategic focus on broad industry disruptions that may shape or complement energy storage deployment and use. The industries responsible for energy storage have access to skilled workforce and development programs to address storage opportunities.
