

AUSTRIA CENTRAL ENERGY AG

What does austriaenergy do? Working in harmony with nature and generating competitively priced renewable energy; we are entering the next stage of the energy transition by producing green hydrogen (H₂) and green ammonia (NH₃). AustriaEnergy has significant experience in the site development and technology integration of renewable energy projects.

Who is Central Energy AG? Central Energy AG is an independent, privately owned energy trading company with its head office in Zug, Switzerland. The company has been incorporated in 1997 and ever since has been engaged in trading and shipping of oil products. Recently, activities have been expanded to include biofuels and soft commodities.

What is energy in Austria? Energy in Austria describes energy and electricity production, consumption and import in Austria. Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed]

Who is austriaenergy group? To date, the Group has developed sites and integrated technologies in approximately 1,000 MW between photovoltaic (PV) and wind energy, these between Europe and Latin America. Since its beginning in Spain the AustriaEnergy Group has expanded its sphere of action, opening subsidiaries in Italy and Eastern Europe.

What does the Austrian Energy Agency do? The Austrian Energy Agency was established by the federal government and states to promote clean energy use in Austria. Besides the Austrian Energy Agency, which acts as a national energy agency, regional institutions performing the tasks of an energy agency exist in all Austrian federal provinces.

AUSTRIA CENTRAL ENERGY AG

Does Austria have an above-average gas supply? The Austrian Energy Agency has analysed which energy policy strategies, decisions and measures from 1945 to 2020 led to Austria's above-average exposure to gas supplies and which lines of argument have become established over the decades. Last but not least, it shows which conclusions can be drawn for the future and used for a new risk assessment.

Under the leadership of RAG Austria AG, safe, seasonal and large-volume storage of renewable energy sources in the form of hydrogen in underground gas storage facilities will be developed by 2025 in cooperation with numerous corporate and research partners ¹. The aim is also to gain valuable technical and economic knowledge for the development

. Electrification begins in Austria and Germany in the period between the end of the 19th and the start of the 20th century.
