As we continue to develop our equipment and services, we produce new product enhancements, such as the Automated Storage and Retrieval System (ASRS). Specially designed for paper storage facilities, this system uses fully-automated cranes to help speed up work cycles, reduce roll damage and track inventory.

Automatic storage simplifies storage management for table spaces. You can create storage groups consisting of paths on which the database manager places your data. Then, the database manager manages the container and space allocation for the table spaces as you create and populate them. You can specify the paths of the default storage group when creating the ???
