Which energy sources are used in the transport sector in Azerbaijan?
Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas(43%) and oil products (39%),followed by electricity (15%). Renewable energy sources,including hydro,contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

What is Azerbaijan's energy regulatory agency? In 2017,the President of Azerbaijan signed a decree establishing the Energy Regulatory Agency under the Ministry of Energyto regulate relationships among producers,suppliers and transmission system operators and distributors,as well as customers in the field of electricity,heat and gas supply.

What is Azerbaijan's potential for small hydropower? Although hydropower is Azerbaijan's largest source of renewable energy today,its potential has not been fully exploited. According to the Ministry of Energy,the country's technical potential for small hydro is 520 MW,which could generate up to 3.2 TWh annually.

What is Azerbaijan's energy potential? According to the Ministry of Energy,the country's technical potential for small hydro is 520 MW,which could generate up to 3.2 TWh annually. Azerbaijan's Renewable Energy Agency under the Ministry of Energy (formerly SAARES) states that the country has up to 800 MW of geothermal energy potential.

What is Azerbaijan's Strategic Roadmap for public utility services? At the end of 2016, the government announced its Strategic Roadmap for the Development of Public Utility Services (electricity and thermal energy, water and gas supply) covering Azerbaijan's 2016 to 2020 development strategy, long-term outlook to 2025 and target vision after 2025.
