Why is China promoting energy storage at the 2025 two sessions? The buzzword a??energy storagea?? at the 2025 Two Sessions underscores Chinaa??s strategic focus on building a resilient, sustainable, and diverse energy system, contributing new efforts to a sustainable global future. The countrya??s progress in new-type energy storage highlights how innovation can drive both economic and environmental progress worldwide.

How will China promote the new-type energy storage manufacturing sector? BEIJING, Feb. 17 -- Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging industries and the country's modern industrial system.

Will China's new energy storage sector grow in 2024? BEIJING a?? China's new energy storage sector saw rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy Administration.

How big is China's energy storage capacity? China's installed new-type energy storage capacity had reached 44.44 gigawatts by the end of June, expanding 40 percent compared with the end of last year, the National Energy Administration (NEA) said on Wednesday. Lithium-ion batteries accounted for 97 percent of China's new-type energy storage capacity at the end of June, the NEA added.

Will China's new energy storage capacity be 30 gigawatts by 2025? China is targeting new-type energy storage installed capacity of 30 gigawatts by 2025, part of efforts to boost renewable power consumption and ensure grid stability, according to a statement by the National Development and Reform Commission and the NEA.
