How do our BESS solutions work? BESS Recombiner collects and combines inputs from solar arrays, BESS, and other DC microgrid components. It allows charging the BESS from renewable sources and discharging the BESS to provide consistent power to the grid. It optimizes site layouts and moves the DC recombiner from the BESS to a centralized location.

Hithium has launched a battery energy storage system (BESS) product suitable for use in desert conditions and plans to build a 5GWh production plant in Saudi Arabia. The Chinese manufacturer and system integrator launched its desert BESS solution at an event in the Kingdom of Saudi Arabia this week, claiming that the product line is customised
