Working in harmony with nature and generating competitively priced renewable energy; we are entering the next stage of the energy transition by producing green hydrogen (H<sub>2</sub>) and green ammonia (NH<sub>3</sub>). Austria, historically being present in markets like Spain, Italy, Bulgaria. Since 2013 also in Chile, where photovoltaic and wind power plants

Commercial Energy Solutions GmbH, Vienna, Austria, Firmenbuch 257576p: Earnings, Revenue, Total assets, Employees, Network, Financial information. Restrict the search to companies from one or more industry segments by selecting from the drop down list.

Of course the world has seen energy-source shifts before. This one is different in a key aspect, however. Even if we tend to speak, for instance, about the twentieth-century transition "from coal to oil", one did not entirely replace the other, rather it was added to the energy mix (so we went from coal to coal-plus-oil).

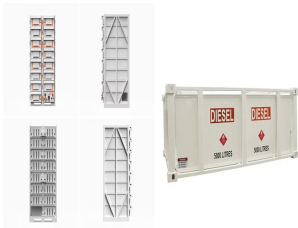

As Austria's largest waste incineration plant operator, the company uses a range of technologies ??? with one exception: nuclear power. "We're proud of this fact," says Alexander. District heating, introduced as early as the 1970s, is now largely generated by waste incineration.
