

BOTSWANA LOME ENERGY STORAGE SUBSIDY POLICY

What is the energy policy in Botswana? This Policy is calling for an increase in private sector development and the IEP will suggest various available options for financing of infrastructure projects and programs in the energy sector of Botswana. The Policy seeks to provide a conducive legal, fiscal and regulatory environment to attract investment into the energy sector.

Does Botswana have a waste management policy? Botswana is also a signatory of the Basel Convention which deals with the control of transboundary movement of hazardous waste and its disposal. Therefore, this policy recognises the need for proper waste disposal from the energy sector as well as handling of hazardous waste within the sector.

Does Botswana need a capacity building program? In order to facilitate an effective development of the energy sector, the government of Botswana is obligated to build the necessary levels of human resource capacity across the board. Various actor groups have varying capacity needs hence capacity building programs should be tailored according to these various needs.

Can livestock residues improve energy production in Botswana? The use of livestock residues (cow-dung) seems to offer the highest practical opportunity for energy production in Botswana, while MSW can also contribute to the improvement of energy generation, especially at the city level.

Why is data management a challenge in Botswana? This policy acknowledges that data management is a challenge in Botswana and there is insufficient energy data to inform accurate planning in the sector. Therefore, the NEP seeks to ensure that energy data is accurate, available and accessible for planning purposes. POLICY STATEMENT ??? P18
