

Did North Macedonia change its energy regulations? There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community???s Third Energy Package (TEP). North Macedonia???s state-owned power company was unbundled and partially privatized in the early 2000s.

What type of electricity does North Macedonia use? North Macedonia relies predominantly on fossil fuels (low-grade lignite and gas) and hydropower, and is dependent on electricity imports. The total generation of electricity in 2022 was 5,634 GWh, and another 1,471 GWh was imported to satisfy the total domestic electricity demand.

What is the National Energy & Climate Plan (necp)? The National Energy and Climate Plan covers the period from 2021 to 2030 and prescribes the path to achieve the goals set for 2030,the government said. North Macedonia was the first Energy Community contracting party to submit its draft NECP to the organization???s secretariat.

Will a new zivojno mine prevent North Macedonia from achieving a timely coal phase-out? However,reality is not following the NECP. According to the state owned electricity company ESM???s 5-year investment plan 2018-2022,the commissioning of a new Zivojno mine could extend the coal supply to TPP Bitola for another ~10.6 years. This would obviously prevent North Macedonia from achieving a timely coal phase-out.
