

# BURUNDI AGENOS ENERGY

The Energy Strategy and Action Plan provides a strong platform for renewable energy development in the country. Only 10% of the population has access to electricity in Burundi, a low rate compared to other countries of the East African Community.

It will also provide an opportunity to develop a detailed roadmap for the sustainability of the energy sector. "The Government of Burundi will implement all necessary reforms to allow the execution of the projects and programmes included in the Universal Energy Access Strategy in Burundi by 2030," said Ibrahim Uwizeye, Minister of Water

Burundi is a small, densely populated, landlocked country in East Africa; and 90% of its 10.6 million inhabitants rely heavily on subsistence agriculture. The majority of its citizens lack adequate nutrition, unable to meet their basic daily caloric needs; and the country is emerging from an economic crisis that resulted after political turmoil in 2015. [???

What is the problem with the energy in Burundi? Burundi is heavily reliant on donor support with its most pressing issue being addressing the unreliable power supply. What is the electricity access rate in Burundi? In 2021, Burundi reportedly had an electricity access rate of 10.23%, a 1.13% increase from 2020.

The interest of companies in investing in renewable energy sources is not waning, so another solar power plant will be built in Nik??i??, more precisely in the Vra??enovi??i settlement. It is an investment planned by the company Agenos Energy from Podgorica, and according to the conducted analyses, it was determined that the possible capacity of

A permanent economic crisis characterised by inflation and fuel shortages is driving an unplanned green revolution in Burundi as consumers flee one of Africa's worst performing utilities for the long-term security of off-grid solar systems. But even in this unforgiving environment some utility-scale projects are advancing thanks to determined international support.
