

# CABO VERDE ENERGY STORAGE FOR SOLAR PANELS

APPLICATION SCENARIOS

In 2012 Cape Verde had an installed electricity generation capacity of around 300 MW, of which about 24% from wind power plants and 3% from photovoltaic stations. While solar power has an enormous potential as a source of renewable energy, natural conditions in Cape Verde are one of the best in the world for the production on wind energy.

The ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE) has inaugurated a renewable energy project in Ribeira Alta, Cabo Verde, enhancing sustainable electricity access in the remote region. Funded by the ECOWAS Special Intervention Fund, this initiative underscores the commitment to energy equity and development in underserved areas.

The ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE), the Cabo Verde Institute for Quality Management and Intellectual Property (IGQPI) and the Centre for Renewable Energy and Industrial Maintenance (CERMI) have launched the first certification for off-grid solar photovoltaic system technicians (level 1) in Cabo Verde.

One research team suggested that a system based on solar, wind and energy storage (as batteries and pumped hydropower) could meet Cape Verde's goals. It certainly has a wide range of options for

Cabo Verde ups renewable energy output with launch of mini-grid. Investing in renewable energy projects . The country boasts a 93% electricity access rate, reaching a 433GWh capacity in 2022. Its energy supply is sourced primarily from thermal power, followed by wind power and solar energy.

The construction is anticipated to commence by August 2023. The project will include connecting the installations to the national grid and the installation of battery storage. The energy minister, Alexandre Monteiro also explained that in addition there were five more renewables projects in progress. These include wind and solar.
