

CAN THE LEBANESE SCIENCE AND TECHNOLOGY MUSEUM STORE ELECTRICITY

Is the Lebanese electricity system sustainable? Energy performance was measured via the ???energy gain ratio???,while economic performance has been presented via the NPV and the levelised cost indicators. The findings show that the Lebanese electricity system is characterized by a weak performancein all analysed aspects related to the sustainability of energy systems.

How has the Lebanese electricity system been evaluated? The Lebanese electricity system has been evaluated in terms of its sustainability through the application of several integrated appraisal techniques. Reliability has been assessed via the LOLP and the S???W index. Environmental performance has been assessed through a LCA and the CML 2001 LCA impact assessment method.

Will the Lebanese electricity sector be benchmarked in the future? The Lebanese electricity sector may be benchmarked in the futurefrom a 2006 baseline. Thus,progress towards sustainability may be measured over time,once sustainable levels for each indicator have been determined.

What are the problems of the Lebanese electricity system? The Lebanese electricity sector The Lebanese electricity system (LES) is a publicly owned sector which suffers from substantial inefficiencies,poor management,and under-investment(inadequate maintenance???emergency maintenance instead of preventive with a chronic lack of spare parts).

Who monopolizes the electricity sector in Lebanon? Thus,the electricity sector is monopolized by EDL Companythat,currently,controls over 90% of the Lebanese electricity sector (including the Kadisha concession in North Lebanon).
