

# CANADA STORAGE POWER

---

Who is energy storage Canada? Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.

Why should you choose energy storage Canada? We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally. Energy Storage Canada is your direct channel to influence, knowledge and critical industry insights.

How much energy storage does Canada need in 2022? Coming soon: the 250MW/1,000MWh Oneida project in Ontario. Image: NRStor. Energy Storage Canada's 2022 report, Energy Storage: A Key Net Zero Pathway in Canada indicates Canada will need a minimum of 8 to 12GW of energy storage to ensure Canada achieves its 2035 goals.

What is the largest battery energy storage facility in Canada? Once built, the Oneida Energy Storage Project would be the largest battery energy storage facility in Canada. This project is a joint venture between NRStor Inc. and Six Nations of the Grand River Development Corporation, with funding from the Canada Infrastructure Bank and a consortium of private lenders.

Where are energy storage projects happening in Canada? Energy Storage Canada 2, a non-profit organization that promotes energy storage, reports that energy storage projects are operating in each of Ontario, Alberta, Saskatchewan, and PEI, with additional projects under development in these provinces as well as in New Brunswick and Nova Scotia 3.
