

CAPEX SOLAR BENIN

How will a European Investment Bank loan help Benin? The European Investment Bank has agreed to provide a EUR 10 million loan to support the deployment of 107,000 high-quality solar home systems to Benin. This will open up access to clean energy for 643,000 people. The solar home systems include solar panels and battery storage to be sold on Pay-As-You-Go (PAYGO) contracts.

Who can benefit from a new off-grid solar scheme in Benin?

Households, smallholders and entrepreneurs in remote locations across Benin will be able to access reliable and cheap electricity for the first time under a new off-grid solar scheme agreed between leading solar energy company ENGIE Energy Access and the European Investment Bank, one of the world's largest financiers of renewable energy.

Will EIB support Engie to deploy off-grid solar power in Benin? The new Benin cooperation follows EIB's previous support for ENGIE to deploy off-grid solar power in Uganda. Benin is the sixth African country to benefit from the EIB's streamlined support for African off-grid energy investment, following recent backing for projects in Mozambique, Uganda, Chad, the Democratic Republic of Congo and the Comoros.

What is PAYGO partnering with the European Investment Bank in Benin?

Our new partnership with the European Investment Bank in Benin will provide ultra-affordable PAYGO systems to people in villages across the country, giving access to clean solar energy and financial empowerment.

Why did Electrifi invest in Les Soleils du Bénin? Lionel Sinsin, Les Soleils du Bénin's General Director, also shared his thoughts on the investment, saying, "This investment from Electrifi is a significant milestone for Les Soleils du Bénin. It underscores the importance of partnerships and demonstrates the shared commitment to providing clean energy access to the people of Benin."

CAPEX SOLAR BENIN

What is the CAPEX development of onshore wind turbines? The CAPEX development of onshore wind turbines is shown in Fig. 6. Due to the expected considerable expansion of the cumulative installed onshore wind turbine capacity between 2020, 2030 and 2050, a constant decrease of the overall CAPEX is estimated.

The reason behind this consideration is that since the cost solar PV system is paid upfront under CAPEX, the cost of solar energy is lower in CAPEX than in DPA and PPA. Under DPA, the ???
