

CATL ENERGY STORAGE BUSINESS DEPARTMENT

What will CATL's energy storage business be like by 2030? CATL's chairman Robin Zeng estimated last year that by 2030, the energy storage business revenue would be comparable to the automotive battery business. (\$1 = RMB 7.2323)

Could a green-grid system be a big opportunity for CATL? But Zeng sees a much bigger opportunity for CATL by supplying green-grid systems including solar and wind power, dedicated storage and a smart system to draw power from parked EVs. China has the world's highest EV-adoption rates; EVs and hybrids have accounted for more than half of all new cars sold there in recent months.

Who is CATL partnering with? CATL has forged and strengthened partnerships with top-tier global players in the industry such as NextEra, Fluence, Wartsila, Tesla, Powin and FlexGen, implementing over 1,000 energy storage projects in over 40 countries and regions with its advanced energy technologies so far.

When will CATL launch a solid-state battery? Zeng expects CATL to start a limited rollout of the technology in 2027. China's government has also provided more than \$830 million to fund research on solid-state batteries industry-wide.

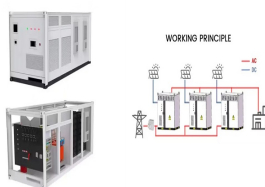

Will CATL build a battery factory in Europe? In Europe, CATL has been working on a plan to build a jointly owned battery factory in Spain with Stellantis (STLAM.MI). That deal could be finalized in January at the latest, Zeng said. CATL operates a six-year-old factory in Germany, its first in Europe, and is building a new plant in Hungary.

CATL ENERGY STORAGE BUSINESS DEPARTMENT

How does CATL work? Leveraging a global network of over 700 service stations, CATL harnesses the synergistic advantages of logistics partners and comprehensive ecosystem support to deliver professional, efficient, and reliable overseas services.

Lin Ruiliang, vice governor of Fujian Provincial People's Government, declared the conference open The first World Energy Storage Conference officially opened on November 9. With the theme of "Global Vision, Innovative Energy Storage," this conference is jointly hosted by the Ningde Municipal People's Government, the Department of Industry and Information ???

In terms of electrochemical energy storage, CATL also ranks first for two consecutive years in energy storage battery shipments, accounting for 43.4% of global energy storage battery shipments in 2022. As of June 2023, CATL has more than 18,000 R& D staff with five R& D centres and 13 production hubs around the world.

The introduction of the Tianheng energy storage system is expected to further solidify CATL's position in the energy storage field. CATL Gasgoo not only offers timely news and profound insight about China auto industry, but also help with business connection and expansion for suppliers and purchasers via multiple channels and methods.

CATL ENERGY STORAGE BUSINESS DEPARTMENT

TENER is equipped with CATL's cell technology and is designed for energy storage applications. TENER achieves an energy density of 430 Wh/L, setting a new standard for LFP batteries in energy storage. LFP batteries have emerged as a leading contender in energy storage thanks to their remarkable safety, longevity, and thermal stability.

Mr. Xiong introduced the progress of the development of energy storage projects for CATL. Mr. Cui expressed his gratitude for the trust and support given to CATL's energy storage business, and expressed his appreciation for the development of the energy storage business proposed by Mr. Li and the joint development of new products, and said

CATL's dedication goes beyond providing energy solutions-it seeks to support the wellbeing of the communities it operates in. In 2023, the company donated 1.5 million forints to build a medical salt room in Debrecen, 20,000 euros to the Pediatric Clinic of the University of Debrecen, and 30,000 euros for the treatment of a Hungarian boy with genetic disease.

Contemporary Amperex Technology Co. Limited (CATL), an industry pioneer in energy storage, unveiled on April 9th in Beijing the world's first mass-production system offering "zero degradation over five years," boasting 6.25 megawatt-hour capacity and advanced safety features that enable widespread production ??? named "Tianheng."
