

CHILE SBL ENERGY

How successful is the Chilean energy policy? The success of the Chilean Energy Policy lies precisely in the fulminant incorporation of NCRE energies. In this way, Chile is presented as a model to follow in terms of climate change and substitution of fossil fuels with wind, small hydro and solar technologies.

Where does Chile get its energy from? This page is part of Global Energy Monitor's Latin America Energy Portal. Chile derives roughly two thirds of its total energy supply from fossil fuels, with oil, coal and natural gas all playing key roles; biofuels, together with smaller amounts of hydro, wind and solar, account for the remainder.

How does Chile benefit from solar energy? The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

Can Chile build a more resilient energy system? Chile has great potential to build a more resilient energy system by diversifying energy sources. The climate conditions in Chile are projected to be favourable for developing renewable energy sources, such as solar and wind, thanks to the comparatively low number of extreme heat events.

What is Chile's energy policy? Two major policies, Chile's Framework Law on Climate Change and the General Law of Electric Services, led Chile's mitigation and adaptation actions in the energy sector. Under these two pillars, Chile's 2050 National Energy Policy (updated version published in 2022), identifies resilience as a key priority.

CHILE SBL ENERGY

How has Chile accelerated its energy transition? Despite its historic ties to fossil fuels and copper mining, Chile in recent years has accelerated its energy transition through broad-based political support, private-public partnerships and innovative green technologies.

SBL Energy Ltd, the second-largest industrial and mining explosives group in India, announces the appointment of Col Shailendra Pathak (retired) as the President of the Defence vertical.
