

# CHINA S LARGEST ENERGY STORAGE GROUP

What is a compressed air energy storage project? A compressed air energy storage (CAES) project in Hubei, China, has come online, with 300MW/1,500MWh of capacity. The 5-hour duration project, called Hubei Yingchang, was built in two years with a total investment of CNY1.95 billion (US\$270 million) and uses abandoned salt mines in the Yingcheng area of Hubei, China's sixth-most populous province.

Who owns China Energy Engineering Corporation? It is the largest grid-connected CAES project of its size in the world, engineering firm China Energy Engineering Corporation claimed in its announcement of the project (or specifically, the first in the world of that scale). The project is owned by China Energy Construction Digital Group and State Grid Hubei Integrated Energy Services Co.

What is China's Energy Project & how does it work? The project has set three world records in terms of single-unit power, energy storage scale and energy conversion efficiency, with total technological self-reliance for key core equipment and deep underground space utilization products, according to multiple project producers, including China Energy Engineering Corp (CEEC), on Thursday.

Who owns China Energy Engineering Corporation & China Energy Construction Digital Group? Both China Energy Engineering Corporation and China Energy Construction Digital Group are part of government-owned Assets Supervision and Administration Commission of the State Council. The project was built three to four times quicker than a pumped hydro energy storage (PHES) plant would need (6-8 years), China Energy Engineering added.

When is the 2nd Energy Storage Summit Asia? Energy-Storage.news publisher Solar Media will host the 2nd Energy Storage Summit Asia, 9-10 July 2024 in Singapore. The event will help give clarity on this nascent, yet quickly growing market, bringing together a community of credible
