

CLASSIFICATION OF POWER STORAGE EQUIPMENT MANUFACTURING STOCKS

What is Industry Classification of an IPO stock? Industry classification of an IPO stock will be undertaken before a company is listed. The assessment of sector classification of an IPO stock will be based on information obtained from the company's IPO prospectus. HSICS will not cover companies listed under Chapter 18B of HKEX listing rules. A review of the HSICS will be conducted annually.

What is the Hang Seng Industry Classification system (HSICs)? The Hang Seng Industry Classification System (HSICS) is a comprehensive industry classification system designed for the Hong Kong stock market.

Why does Hong Kong need a detailed Industry Classification? Prompted by the listing of a wide variety of companies in different industries in Hong Kong, it meets the need for a detailed industry classification that reflects stock performance in different sectors.

What is the primary parameter of Industry Classification? The primary parameter of industry classification is the sales revenue from each business area of a listed company. Profit or assets will also be taken into consideration where these better reflect the company's business.

What happens if a company is classified to a sector? To preserve stability in the classification of a company, once a company is classified to a sector, it will remain there unless there is a significant change in how the company derives its revenue (or profit or assets if relevant).

CLASSIFICATION OF POWER STORAGE EQUIPMENT MANUFACTURING STOCKS

What information is used to classify a listed company? The industry classification of each listed company is based on audited financial information of the latest financial year contained in the company's annual report. Other publicly available information, such as prospectuses, interim reports or company announcements will be used if relevant.
