Does India have a battery supply chain? Across all segments of the battery supply chain, India's production is presently negligible, but Indian companies have existing mineral production, processing expertise, battery cell investments, battery pack assembly capacity, and recycling experience.

Does India have a high production potential in battery packs? However, India's high production potential in battery packs for two-wheeled and three-wheeled vehicles is supported by the Indian central government's Electric Mobility Promotion Scheme 2024, which offers purchase subsidies for two-wheeled and three-wheeled electric vehicles with traction battery packs assembled in India.

Does India have a battery production capacity? Similarly, India does not have sizable production capacity for battery cells (i.e., less than 1 percent of global capacity), but Indian companies are building battery cell production facilities, with LFP chemistries estimated to represent 70 percent of India's future battery production.

How can India reduce dependence on China in the global battery supply chain? To reduce dependence on China in the global battery supply chain, opportunities for international collaboration exist between India, other countries, and international financial institutions.

Why did India join the Battery Energy Storage Systems Consortium? India's decision to join the Battery Energy Storage Systems Consortium for Renewable Energy Integration signifies a collective recognition of the pivotal role that battery storage systems play in achieving sustainable energy goals. This collaboration aligns with Jackson Group's ethos of staying at the forefront of technological advancements.
