Pure Lithium is acquiring all the assets, including intellectual property, of Dimien, a vanadium cathode materials innovator in Buffalo, US. This represents a significant advancement in Pure Lithium's efforts to fully commercialise its lithium metal-vanadium (LVO) battery, which can potentially reduce the US" reliance on China for current battery materials.

Nonetheless, several European companies are experiencing significant setbacks. According to Galp, a partner in the 50-50 joint venture Aurora with Swedish battery maker Northvolt, construction of its battery-grade lithium refinery in Portugal will be delayed until 2026 due to project complexity and grant funding uncertainty.. the Valley Center Fire Department." The project, near San Diego, was announced as online by Terra-Gen in March 2022 and has an energy storage capacity of 140MW/560MWh. It made headlines earlier this year when some 100 LG lithium-ion battery packs were stolen from late December 2022 through January 2023.

US-based Volt Lithium has produced 99.5% battery-grade lithium carbonate from oilfield brine in the Permian Basin in West Texas, using its DLE technology. The company has developed DLE technology aimed at extracting lithium from North American oilfield brines, contributing to a secure critical minerals supply chain for the region.

Significant investments in innovation have paved the way for the next generation of longer-lived batteries that do not need deep-sea minerals. Alternatives such as cobalt-free lithium iron phosphate (LFP) batteries, lithium-free sodium-ion ???
