Current Demand: As of 2020, the off-grid solar energy demand in the Democratic Republic of Congo (DRC) was estimated at 30,788.6 MWh.. Projected Demand: off-grid solar energy demand is expected to reach an approximate 85,819.1 MWh by 2030 due to limited grid supply which has led to a high demand for off-grid solar solutions.

As it is for Nigeria, off-grid solar power is cheaper for lower electricity usage levels. Off-grid solar would, by our estimates, be cheapest for between 28% and 88% of the 16 million people, depending on demand levels. When carbon pricing is factored in, this increases to 88% from 50%, with the greatest impact seen at higher demand levels.
