

# CRIMSON ENERGY STORAGE PROJECT MALAYSIA

What is Crimson energy storage? Image: Recurrent Energy. Project partners Canadian Solar and Axium Infrastructure have begun the operation of Crimson Energy Storage, a large-scale battery energy storage system (BESS) in Riverside County, California. California's Governor Gavin Newsom was among those celebrating the 350MW/1,400MWh project's inauguration.

What is the Crimson solar project? In 2021, the Bureau of Land Management (BLM) in the US granted final approval to the Crimson Solar Project. The approval enabled Recurrent Energy's wholly-owned subsidiary Sonoran West Solar Holdings to develop the 350 MW solar photovoltaic facility as well as the 350MW battery storage system.

What is crimson storage? Crimson Storage is also the second-largest energy storage project currently in operation of any configuration. The 350 megawatt (MW)/1400 megawatt-hour (MWh) battery storage project, which sits on 2,000 acres west of Blythe in Riverside County, broke ground in 2021.

Who owns Crimson storage? In September 2021, Recurrent Energy, which is a wholly-owned subsidiary of Canadian Solar, sold an 80% stake in the energy storage project to Axium Infrastructure (Axium). Recurrent Energy retained 20% ownership in the facility. Crimson Storage is developed on public lands about 13 miles west of Blythe, in Riverside County, California.

Where is the Crimson energy storage project located? The entire project includes approximately 2,000 acres of BLM-managed land, located 13 miles west of Blythe in Riverside County. The Crimson Energy Storage Project is in an area analyzed and identified as suitable for renewable energy development as part of BLM's Desert Renewable Energy Conservation Plan Land Use Plan Amendment.

# CRIMSON ENERGY STORAGE PROJECT MALAYSIA

How much land does Crimson storage use? The entire project, including the storage and the solar facility, will include about 2,000 acres of land administered by the BLM. According to Recurrent Energy, Crimson Storage is the first standalone energy storage project that gained approval to site on BLM lands under the Biden Administration.

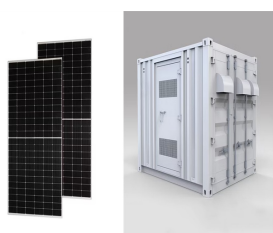

The Crimson Energy Storage project epitomizes California leadership in clean energy, innovation, and economic development through good, union jobs. We've been laser focused on quickly bringing

Project partners Canadian Solar and Axiom Infrastructure have begun the operation of Crimson Energy Storage, a large-scale battery energy storage system (BESS) in Riverside County, California. California's Governor

The battery storage project will provide 1400 megawatt-hours of electricity at full capacity and is a significant milestone in the Biden-Harris administration's efforts to modernize America's power infrastructure in the

Axiom Infrastructure ("Axiom") and Canadian Solar Inc.'s ("Canadian Solar") subsidiaries Recurrent Energy and CSI Energy Storage, announced that Crimson Storage, a

# CRIMSON ENERGY STORAGE PROJECT MALAYSIA

Located in California's Sonoran Desert, this project consists of a 350 MW utility-scale solar photovoltaic (PV) facility and a 350 MW Battery Energy Storage System (BESS) facility. This ???

Energy and CSI Energy Storage Announce Operation of World's Largest Single Phase Energy Storage Project Crimson Storage is now providing flexible generation to the California grid and ???

Large-scale solar is a non-reversible trend in the energy mix of Malaysia. Due to the mismatch between the peak of solar energy generation and the peak demand, energy storage projects are essential and crucial to optimize ???

Axiom Infrastructure and Canadian Solar subsidiaries Recurrent Energy and CSI Energy Storage today announced that Crimson Storage, a 350-MW/1,400-MWh standalone energy storage project, is now in ???

The Crimson Storage project site is on public lands in the California desert, west of Blythe in Riverside County. Image used courtesy of Canadian Solar Crimson Storage Project. The Crimson battery energy storage ???

# CRIMSON ENERGY STORAGE PROJECT MALAYSIA

The battery energy storage arm of PV module firm Canadian Solar has won a 800MWh order for a project in Arizona from Tucson Electric Power. The 1,400MWh Crimson Energy Storage project in California, the ???

Tenaga Nasional Bhd will kick-start a 400 megawatt-hour (MWh) battery energy storage system (BESS) pilot project in this quarter, marking Malaysia's first utility-scale battery storage project to address intermittency ???

Axiom Infrastructure ("Axiom"). Recurrent Energy will retain the remaining 20% ownership. Construction of the storage project will begin in Q3 2021 and is expected to reach commercial ???
