What is the energy storage safety strategic plan? Under the Energy Storage Safety Strategic Plan, developed with the support of the U.S. Department of Energy (DOE) Office of Electricity Delivery and Energy Reliability Energy Storage Program by Pacific Northwest Laboratory and Sandia National Laboratories, an Energy Storage Safety initiative has been underway since July 2015.

How are energy storage systems rated? Energy storage systems are also rated by power delivery capacity in units of kilowatts. The power rating is important to determine the rate at which power can be delivered and will vary according to the application and relevant load profiles.

How often should a solar facility be inspected? Visual inspection of Solar Facility's general site conditions, PV arrays, electrical equipment, mounting structure, fence, shading, trackers, vegetation, animal damage, erosion, corrosion, and discolored panels. 1x per year 2 Visual inspection and correction of Solar Facility for loose electrical connections and ground connections. 1x per year 127

Do energy storage products need periodic maintenance? The requirements for periodic maintenance for energy storage products should be identified by the OEM (IEEE 2010). In settings where predictive analytics maintenance is economical, 54 This report is available at no cost from the National Renewable Energy Laboratory (NREL) at

Can CSRS be applied to energy storage systems? Until existing model codes and standards are updated or new ones are developed and then adopted, one seeking to deploy energy storage technologies or needing to verify the safety of an installation may be challenged in trying to apply currently implemented CSRs to an energy storage system (ESS).

What is a reasonable expectation of PV system O&M costs? Members of the working group have discussed these results and are currently recommending 0.5% for large systems and 1% of system initial cost per year for small systems as a reasonable expectation of PV system O&M costs. These heuristics inform an expectation of PV system O&M costs.
