

# DEPARTMENT FOR ENERGY STORAGE PROJECT DOCKING

What is the energy storage strategy & roadmap (SRM)? WASHINGTON, D.C. ??? The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE???'s investment in future planning of energy storage research, development, demonstration, and deployment projects.

Is Doe preparing a draft energy storage SRM for public comment? DOE is seeking comment from stakeholders to inform its draft Energy Storage SRM for public comment at a future time; notice of its availability will be provided through the Federal Register through a formal NOA. Interested stakeholders can view both the draft SRM and the official NOA.

Will the DOE repost the SRM? The DOE, at its discretion, anticipates reposting the SRM in draft form at a later time for public comment to inform the final version of the SRM. Learn more about DOE???'s energy storage activities supporting DOE???'s energy storage mission and vision through the Energy Storage Grand Challenge.

Why is Doe investing in energy storage? The underlying motivation for DOE???'s strategic investment in energy storage is to ensure that the American people will have access to energy storage innovations that enable resilient, flexible, affordable, and secure energy systems and supply, for everyone, everywhere.

Does the energy storage strategic plan address new policy actions? This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. ? 17232 (b) (5)).

What is the energy storage SRM? Specifically, the draft Energy Storage SRM updates the earlier ESGC Roadmap in consideration of the progress made across the energy storage sector since 2020, as well as reflects DOE's recent activities in support of its energy storage mission and vision.

As a model of industry-university-research cooperation in Tsinghua University, the project received strong support and assistance from the National Energy Administration, Jiangsu Energy Administration, State Grid, Changzhou

Xi'an Jiaotong University, North China Electric Power University, and other colleges and universities have already added such energy storage disciplines. to Recommendation No. 9178 of the Third Session of the

The Docking State Office Building reconstruction project will celebrate the Docking Building's design legacy as a forward thinking and contemporary design of its time by utilizing advanced design and engineering strategies to achieve

WASHINGTON, D.C. The U.S. Department of Energy (DOE) today announced an investment of \$25 million across 11 projects to advance materials, processes, machines, and equipment for domestic manufacturing of
