Contexts: Ministry of Power has released draft guidelines for Tariff based competitive bidding for procurement of storage capacity/stored energy from pumped storage plants. The draft proposes a single stage two-part bidding process, consisting of technical and financial bidding stages for procuring storage capacity from pumped storage projects.

Solar and energy storage system integrator CS Energy said last week that it has been selected by an unnamed independent power producer (IPP) to work on a hybrid DC-coupled 5.1MW solar PV power plant with 2.5MW of battery storage in the New England state. CS Energy will be prime contractor performing engineering, procurement and construction

Concerning utility-scale energy storage, there is a pressing need for its deployment. Additionally, the crucial role played by grid-side energy storage installations, dominated by standalone and shared energy storage, is expected to be a significant driver for the growth of utility-scale storage. Projections for New Installations of ESS in 2024
