A battery can store electric charge so that it can be used to power a craft's systems such as radio transmissions, reaction wheels, and probe cores. While command pods do store some electric charge, most batteries store much more. Every variety of battery has the same charge per unit mass, 20 units of electric charge per kilogram. Available batteries

Be aware that kerbalism has serious incompatibilities with "Near future" stuff, specifically - reactors and dynamic battery storage. Reactors are broken completely and you might experience serious weirdness with EC consumption, ranging from amusing to game breaking.

Dynamic Battery Storage ^ - MechJeb is kind of controversial due to making this game quite easy and you dont need any brain to use it. To not be called lazy, I would recommend not installing this mod first and experience everything that this game has to offer, and then install that mod to assist you, note the word assist.

@Nertea For the situation of DBS and the abundant ElectricCharge storage, the root of the problem has to be that DBS does not agree with Angel-125's tank switcher module. (One of the OPT cargo bays must be set as a battery bank.) For the situation of the empty Thermal UI tab, the OPT cargo bays have radiator modules in them but no System Heat patch ???

I have installed the following mods, perhaps one of these is to blame but after reading all I could find on KSP Interstellar Extended and Near Future technologies (my main two suspects), there was no indication either of them modified the Dawn engine. When I installed one of the "Near Future Technologies" mods it installed something called "Dynamic Battery Storage" as an add-on mod that fixed the problem. "Dynamic Battery Storage" is on CKAN, I am not entirely sure how to get it to work without CKAN because the link to it in CKAN goes to another mod from the same author.

Finally, if you have KSP Interstellar Extended, you should really choose between that and Far Future. They conflict and overlap, utilizing different subsystems for heat and electricity. Orbital fuel storage. r/SolarDIY ??? quick parallel battery fuse question.
