One significant step in this regard is the establishment of EBZ nano power which will help the EBZ Group to achieve a strong position in growing and sustainable markets. In addition, the EBZ Group pursues its own clear CO₂ reduction targets.

Within a short period of time, you are able to charge the battery with high power without any extreme heating of the battery system and thus decreasing its cyclic and calendar lifespan. LTO batteries are currently the most suitable for fast charging (the best ones have a life span of 25.000 39.000 cycles at 80% DOD).
