Goal 12 Targets. 12.1 Implement the 10-year framework of programmes on sustainable consumption and production, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries. 12.2 By 2030, achieve the sustainable management and efficient use of natural resources. 12.3 By 2030, ???

We have pioneered eco-efficient solutions, such as the regenerative drive, standby solutions, and the revolutionary KONE UltraRope(R) high-rise hoisting technology. KONE UltraRope(R) can cut the energy consumption of, for example, a 500-meter elevator ride, by up to 15%. For higher buildings, the energy saving is even more notable.

Modular packaging not only enhances efficiency but also reduces the need for multiple packaging solutions, further contributing to sustainability efforts. The future of minimalist packaging The minimalism movement in packaging design is more than a trend; it represents a fundamental shift in how companies approach packaging.

The global economy has climbed from 1.37 to 85.93 trillion dollars during the period from 1960 to 2018 (World Bank, 2018). However, this rapid economic growth has resulted in excessive consumption of resources and ecological problems (Huang et al., 2021; Zhang et al., 2019a; Chen et al., 2019a). For example, one report shows that the total primary energy supply ???

A big thank you to the whole team of Ecoefficient Solutions. It was an absolutely pleasure to work with Laura, her team and the electricians who did the whole installation in a day (even facing a few challenges and no time for coffees). It was always a dream of us to go solar. Not only to save money, just to do something for the planet.
