What is Enefit 280 used for? It can be used both in general and road construction and as aggregate for concrete. We give new life to the material left over from oil shale mining. The Enefit 280 technology enables pyrolysis of oil shale together with plastic waste and old tyres, turning it into a quality product.

When Enefit Green went public in 2021, we planned to increase our 457-megawatt electricity production capacity by 2.4 times, reaching 1,100 megawatts by 2025. This growth was to be supported by additional equity raised during the IPO and subsequently secured debt capital. Currently, we operate 592 megawatts of production capacity, with an
