

The image displays two perspectives of a heavy-duty metal safe. On the left, the safe's door is open, revealing a well-organized interior with multiple drawers at the bottom and several hanging hooks or small shelves above. The door itself has a sturdy handle and a locking mechanism. On the right, the safe is shown closed, highlighting its robust construction and a complex locking system featuring multiple bolts and a secure dial or keypad interface.

According to Pierre El-Khoury, General Director of the Lebanese Center for Energy Conservation, Lebanon's total solar power generating capacity has increased eight-fold since 2020. Solar panels were available before 2019, but few people opted to install them, since electricity supplied by EDL and private generator providers was cheaper.

The Beirut River Solar Snake (BRSS) project is the first grid-connected medium voltage (MV) solar photovoltaic (PV) system in the history of Lebanon. The dream of having a solar PV system on the top of the Beirut River bed emerged at the Lebanese Center for Energy Conservation (LCEC) back in 2012 based on a clear concept: if the Lebanese

Lebanon has around 300 sunny days in a year with over 8- 9 hours of daily sunshine. While Lebanon is suffering from electricity supply shortage, solar energy presents a clean alternative that can, if properly designed, remove the need for diesel self-generation and lower the national utility electricity bill.

According to the International Energy Agency (IEA), solar energy is expected to become the main source of electricity by 2050. TotalEnergies Marketing Lebanon has taken on the challenge of solar energy; the subsidiary has begun to roll out the Company's project in Lebanon, and to equip its service stations with photovoltaic panels.

## EnergyLIB P1 All-In-One

EnergyLIB P1 All-In-One is a compact, all-in-one solar storage solution. It combines a high-capacity lithium-ion battery with a solar charge controller and an inverter. This makes it ideal for off-grid applications where space is limited. The unit is designed for long-term use and is easy to install. It can store up to 10kWh of energy, which is enough to power a small home for several days. The unit is also compatible with solar panels, making it a complete solar solution. The unit is made of high-quality materials and is designed to withstand harsh weather conditions. It is also easy to maintain and has a long warranty. The unit is a great choice for anyone looking for a reliable, all-in-one solar storage solution.

Learn about SOLARYA's journey in revolutionizing energy with top-tier solar solutions. Read Our Story. What We Do. Solarya offers expert consultancy to design efficient solar systems, reliable supply of top-quality solar products and batteries, and thorough maintenance services to ensure long-term performance. Let us support your energy needs
