

ENERGY STORAGE BUSINESS BACKGROUND

Are energy storage business models the future? The lessons from twelve case studies on energy storage business models give a glimpse of the future and show what players can do today. The advent of new energy storage business models will affect all players in the energy value chain. In this publication we offer some recommendations.

What are the emerging energy storage business models? The independent energy storage model under the spot power market and the shared energy storage model are emerging energy storage business models. They emphasized the independent status of energy storage. The energy storage has truly been upgraded from an auxiliary industry to the main industry.

What business models are used in energy storage technology? According to this review, the two-part tariff model, the negotiated lease model and the energy performance contracting model are traditional business models that have been practiced for a long time. The application of these business models to energy storage technology has achieved good results.

Is energy storage a new business opportunity? With the rise of intermittent renewables, energy storage is needed to maintain balance between demand and supply. With a changing role for storage in the energy system, new business opportunities for energy storage will arise and players are preparing to seize these new business opportunities.

Are there any gaps in energy storage technologies? Even though several reviews of energy storage technologies have been published, there are still some gaps that need to be filled, including: a) the development of energy storage in China; b) role of energy storage in different application scenarios of the power system; c) analysis and discussion on the business model of energy storage in China.

ENERGY STORAGE BUSINESS BACKGROUND

How will new energy storage business models affect the energy value chain? The advent of new energy storage business models will affect all players in the energy value chain. In this publication we offer some recommendations. The new business models in energy storage may not have crystallized yet. But the first outlines are becoming clear. Now is the time to experiment, gain experience and build partnerships.
