

ENERGY STORAGE FINANCING MODELS

Why do energy storage projects need project financing? The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Can you finance a solar energy storage project? Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

Should the energy storage industry evaluate policies and financing models? The next consideration is for the energy storage industry to evaluate the policies and financing models that have allowed the renewable energy industry to expand over the last decade and to replicate what worked well and improve on the identified shortcomings.

How do energy storage projects access FCAS? Energy storage projects can access FCAS through eight potential markets (refer to Figure 4). Control and fast regulation of the network voltage after a fault occurs (TOSAS). Generators that provide energy to the transmission grid to assist restart following a complete or partial black out.

Can 'bank' energy storage projects support cash flows? In the context of utility scale energy storage (energy storage)¹ assets, the current electricity market and regulatory framework does not support cash flows of this nature. This creates a significant challenge for private sector investors and financiers to 'bank' storage projects. Payments for providing 'ancillary services'.

Will a tax credit be available for energy storage projects? However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.
