

ENERGY STORAGE LEADER S SPEECH

Why is China promoting energy storage at the 2025 two sessions? The buzzword ???energy storage??? at the 2025 Two Sessions underscores China???s strategic focus on building a resilient, sustainable, and diverse energy system, contributing new efforts to a sustainable global future. The country???s progress in new-type energy storage highlights how innovation can drive both economic and environmental progress worldwide.

Is energy storage a good idea for small businesses? On a smaller scale,energy storage is unlocking new economic opportunities for small businesses. By integrating renewable power with agriculture,individuals can store and supply excess energy,enhancing national grid resilience and diversity while generating profit. China has been a global leader in renewable energy for a decade.

Who invented stationary energy storage? Twenty years ago, when Dr. Gyuk took charge of the stationary energy storage program, the technology was only beginning to be explored. There were very few demonstrations and the rare industry meetings were only attended by a handful of researchers, scientists, and dreamers.

What is new-type energy storage? This year,???new-type energy storage??? has emerged as a buzzword. Unlike traditional energy,new energy sources typically fluctuate with natural conditions. Advanced storage solutionscan store excess power during peak generation and release it when needed,enabling greater reliance on renewables as a primary energy source.
