System Topology

The diagram illustrates the system topology for a container-based energy storage system. A central horizontal line represents the DC Line, which connects various components. On the left, a Charging Hub is connected to the DC Line. Below the DC Line, an Energy Storage System is shown, connected to the DC Line via a Bidirectional Converter. To the right of the Energy Storage System, a Bidirectional Converter is connected to the DC Line, which in turn is connected to a Grid. Further right, a Grid is connected to the DC Line, which is connected to a Grid. On the far right, a Grid is connected to the DC Line, which is connected to a Grid. A legend at the bottom right identifies the line types: DC Line (solid blue line), AC Line (dashed blue line), and Bidirectional Converter (dashed blue line with arrows).
