

# ENERGY STORAGE MOBILE SPOT WELDING MACHINE

What is a portable spot welder? A Portable Spot Welding Machine is mainly used in the welding of nickel sheets for cylindrical batteries like 18650. It has a built-in high-rate polymer power cell with a maximum output current of up to 639A, allowing it to weld thousands of points after being fully charged.

What is a super energy gathered pulse welder? The machine's super energy-gathered pulse technology combines with a max welding power of 19.8 KW to provide a reliable welding effect. The welder's small size and light weight make it more portable compared to a bulky traditional spot welder. The aluminum alloy housing also provides a more powerful and reliable machine.

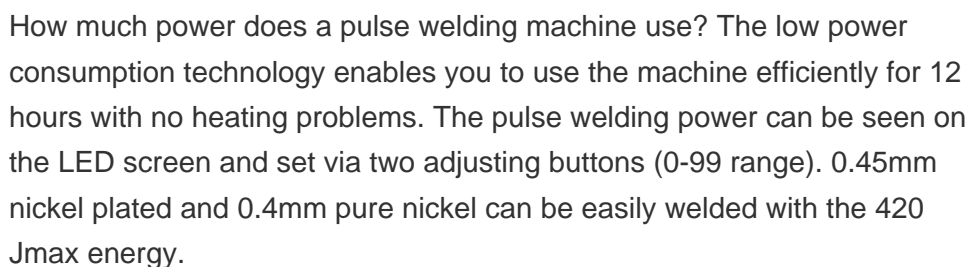

What is a glitter 801h battery spot welder? The newly designed Glitter 801H battery spot welder combines the millisecond pulse welding technology and the latest capacitor energy-storage patent, bringing you a brand-new powerful and reliable spot welding machine.

What is a glitter battery spot welder? The newly designed GLITTER battery spot welder is equipped with two super capacitors for energy storage and power supply for pulse welding. Compared to a traditional AC spot welder, it does not interfere with the electric circuit, which means no more tripping problems.

What is pulse welding power? The pulse welding power can be seen on the LED screen and set via two adjusting buttons (0-99 range). 0.45mm nickel plated and 0.4mm pure nickel can be easily welded with the 420 J max energy. Widely used in battery pack building & maintenance and common metal welding.
