What is the capacitor energy storage pulse welding machine? The Glitter newly designed and patented 801/811 series product are equipped with multiple super capacitors for energy storage and power supply for pulse welding. Comparing to the traditional AC transformer spot welders, it is more powerful, stable and portable.

The Stored Energy welding power supply a?? commonly called a Capacitive Discharge Welder or CD Welder a?? extracts energy from the power line over a period of time and stores it in welding capacitors. Thus, the effective weld energy is independent of line voltage fluctuations. This stored energy is rapidly discharged through a pulse transformer producing a flow of electrical current a?|
