

ENERGY VOLTUS INDIA

What is voltus? Voltus is the leading virtual power plant operator and distributed energy resource technology platform. New feature, partnership, customer, and organization announcements. Join a team of bright, gritty, and good Voltans, working to accelerate the energy transition.

Who is voltus & what did he do before he started? Prior to founding Voltus, Matt was the CEO of EcoFactor, a connected home software developer and operator of the award winning, 70 MW residential demand response program with Nevada Energy. Prior to that, Matt held VP of Sales roles at Bidgely and at EnerNOC.

What does Voltas do? As part of our vision to provide sustainable and equitable energy distribution, Voltas is at the forefront of developing solar energy projects across the nation. Voltas was one of the contributors in Asia's largest solar park at Rewa in Madhya Pradesh, which generates 750 MW of power.

What makes voltus a global leader? His passion for solving big problems using the Internet of Things sets the foundation for Voltus to elegantly scale into a global leader. Previously, as Chief Technology Officer and founder of MindMe, Neil developed wireless technology for networked microgrids in developing world markets.

Are India's energy giants balancing energy security and environmental sustainability? India's energy giants are demonstrating how to balance the dual priorities of energy security and environmental sustainability. As custodians of the nation's energy needs, these companies recognize the importance of maintaining a reliable supply to support economic growth while also addressing global demands for cleaner energy solutions.
