

# ETHIOPIA BESS BUILDING

Why is Addis Ababa becoming a modern city? In the past two decades, Addis Ababa, Ethiopia's capital city has undergone a rapid architectural transformation, with the massive demolition of old buildings and the construction of high-rise buildings. African architects have taken the opportunity to showcase their creative designs to take part in Addis Ababa's modernization.

Why did Haile Selassie build a building in Addis Ababa? When Emperor Haile Selassie returned from exile, he wanted to reinvent Ethiopia's architecture. It took him more than 15 years after his triumphant return to initiate building projects in Addis Ababa. During this period, indigenous buildings were constructed. They were unique but later deemed unsuitable for the nation's capital.

What makes Ethiopia unique? Ethiopia, a country rich in history and cultural diversity, boasts some of the most unique and stunning architectural buildings in Africa. From ancient churches carved into rock to modern skyscrapers, the architectural landscape is a blend of the old and the new.

What does Ethiopian parliament look like in Addis Ababa? The Ethiopian Parliament is a significant landmark in Addis Ababa and continues to be an important seat of government. This is one of Ethiopia's most known place in Addis. Yeparlamaw seat specially. It does not look like a parliament. Nothing too grandiose about it. It is ugly.

What is modern Ethiopian architecture? Modern Ethiopian architecture represents a convergence of traditional elements and contemporary design. The Central Bank of Ethiopia (CBE) Building is a prime example, standing at 198 meters tall with 46 floors. This skyscraper exemplifies Ethiopia's economic growth and urbanization.
