Are flexible solar panels better than rigid solar panels? Reliability - Because the materials used to create flexible solar panels are less durable than rigid designs, their flexible nature makes them more susceptible to damage and breakage over time. As a result, many flexible solar panels have a solar warranty of up to 5 years, compared to 25 years for a rigid panel.

Are flexible solar panels a barrier to solar projects? A barrier to various solar projects can be the limited roof space which is available for the installation of solar cells. Due to their thin layers, flexible solar panels need relatively more space to generate the same amount of energy as their traditional counterparts.
