Can French Guiana produce electricity? recycling is another potential avenue for electricity production in French Guiana. There are currently only two waste storage, sorting, and processing facilities, namely, a recycling center and a composting platform. The development of this sector seems particularly difficult as it would require a rate of public investment

Why is wind energy so expensive in French Guiana? Wind energy remains expensive because it requires major civil engineering work, and the necessary know-how is not necessarily available locally. As with biomass, the production cost per kWh is considered too high. recycling is another potential avenue for electricity production in French Guiana.

How does ceog fit with French Guiana's energy strategy? The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.
