

GEORGIA NEW ENERGY PROJECT ENERGY STORAGE PROJECT

Does Georgia Power have a new battery energy storage system? ATLANTA, Aug. 29, 2024 /PRNewswire /-- Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's 2023 Integrated Resource Plan (IRP) Update.

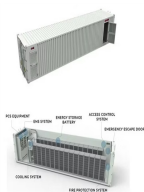

Will Georgia Power Add 500MW of battery energy storage? Georgia Power will add 500MW of battery energy storage at four sites, including Robins AFB, boosting renewable energy capacity statewide.

Will Georgia Power Add 500 megawatts to its energy supply portfolio? The Atlanta-based utility's proposal, which was approved without discussion, will add 500 megawatts of electrical generating capacity to Georgia Power's energy supply portfolio. One megawatt is enough electricity to power 750 homes.

Is Georgia Power completing a BESS project? In addition to the 500 MW BESS projects from the 2023 IRP Update, Georgia Power is nearing completion on the 65 MW Mossy Branch Battery Facility located in Talbot County, Georgia. Mossy Branch was approved in the 2019 IRP and will be Georgia Power's first BESS resource.

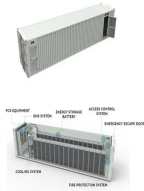

What is Georgia Power doing in 2022? The company is also developing the 265 MW McGraw Ford Phase I BESS project, approved in the 2022 IRP, and expects it to enter service by the end of 2026. To learn more about how Georgia Power is meeting the needs of customers through a diverse, balanced energy portfolio, visit
