How much does a solar panel cost in Georgia? We at the Guides Home Team conducted a solar panel cost survey across all US states. In Georgia, the average cost of a solar power system is \$2.60 per watt. You can expect to pay \$15,600 for a 6-kW home solar system. The 30% federal tax credit is \$4,680 in this case. The net cost of your solar installation is reduced to \$10,920.

Does Georgia have a solar rebate program? Georgia gets plenty of sunshine, just slightly less than the neighboring state of Florida. This means that solar panels can generate more electricity than in many other U.S. regions. Unfortunately, Georgia does not offer solar rebate programs and tax incentives as of 2023.

Does Georgia Power offer solar? From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Does Georgia offer solar incentives? Learn about the solar incentives, tax credits, and rebates offered in Georgia and get a quote on a solar installation for your home. Georgia ranks seventh among the top solar states, with an installed capacity of 5,033 megawatts (MW).

Does Georgia Power Company offer a solar extension program? The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.
