London, UK / Arnhem, the Netherlands, February 6 ??? The new framework document, developed over two years in collaboration with leading consultants and developers, will lead to more transparency and advancements in the quantification of project losses and uncertainties says DNV KEMA. Various entities in the Renewable UK Wind Resource Working Group have come ???

Whether they will be reached, missed, or overshoot depends on multiple factors, most of which concern policymakers and the energy sector itself. At the end of 2023, the EU increased the binding renewable energy target for 2030 to 42.5%, encouraging countries to aim for 45%. The US has a goal of 80% of renewable energy generation by 2030.

Energy storage facilities are indispensable for a revolution in energy production, as they add predictability to the fluctuations of eco-power. The German government has therefore started to sponsor the development and launch of storage technologies, and have used expertise of solar equipment manufacturers to explore the possibilities. PES

Hitachi Energy is one company that is contributing to this expansion, focusing on technological innovations, infrastructure improvements, and strategic collaborations that are driving the renewable energy transition. PES wanted to hear from Laura Fleming, Country Managing Director for the UK & Ireland, and Alfredo Parres, Head of Renewables
