

GUINEA GRIDSTORE ENERGY

Break the boundaries of conventional storage solutions with Gridstore, the automated and robot-assisted storage system. Flexible, compact and powerful, combined with unbeatable control software, it forms the basis for highly efficient storage and picking processes.

According to AFREC 2020 energy balance, the main primary energy sources that make up the energy mix in Guinea are biomass, and oil while electricity is mainly generated from hydro-electricity sources and fossil thermal sources. With 77% biomass (mostly charcoal) has the largest contribution in primary energy consumption in Guinea. More than 84% of households have ???
