Guyana has some of the highest electricity rates in the Americas and is about 97% dependent on imported fossil fuels. Using natural gas as a bridge away from heavy fuel oil, followed by the Amaila Falls Hydropower Project and an expansion of solar, wind and biomass, Guyana will see a massive expansion of renewable energy across the country.

Ad Terra Energy has initiated collaborations with various operators using this methodology to store excess spring and summer photovoltaic production in the form of hydrogen which is then converted into electricity the colder seasons when demand increases. Projects inspired by geothermal energy hold promise for future energy storage.

Ad Terra Consultancy provides technical, commercial and regulatory support to the energy sector internationally since 2010. Our expertise includes oil and gas exploration, production, and decarbonisation, renewables (geothermal, solar, wind and biomass), critical raw materials (direct lithium extraction and helium), carbon capture and storage, carbon emissions monitoring and ???
