---

Can solar energy be used effectively in Haiti? Solar energy can be used effectively in Haiti, offering energy self-sufficiency to the most isolated cities in the absence of a power grid. The country's location in the tropics gives it very strong solar energy potential. It is believed that solar energy will play a fundamental role in access to electricity over the next 10 to 15 years.

Is Haiti a solar power market? Recently, many solar companies have seen Haiti as a huge market potential for solar energy. The founder of 10Power estimates that the potential solar power market is worth over \$500 million. In 2013, the completion of Hôpital Universitaire de Mirebalais came to an end. This hospital is the largest solar-powered hospital in the world.

1. Call local solar companies or electricians to finish or repair the installation. If you have any issues with your installation, or if the company goes out of business mid-install, you can call other local solar companies to take over the service. Don't get your hopes up - most solar companies don't take on jobs done by someone else. Why?

Haiti regularly has difficulties with its energy supply, a situation made worse by the control and violence wielded by gangs in the main districts of the capital. As a result, Haiti's national electricity company is struggling to supply homes and infrastructure, and users are regularly faced with long power cuts that can last up to several weeks.

Brighten Haiti's current campaign to deploy 300 solar systems throughout rural Haiti is the largest solar for schools initiative in Haiti's history. Each rural school will receive a 3kW Photovoltaic (PV) system. On approval from Bethel Computers for Education, they will also get and a self contained computer lab with 6,000 books, the
