Compatibility: Ensure that the BMS is specifically designed for LiFePO4 cells. Different battery chemistries require different BMS configurations, so it's crucial to select a BMS compatible with LiFePO4 chemistry. Voltage and Current Monitoring: The BMS should accurately monitor the voltage and current of each cell in the LiFePO4 battery pack.

REC can also do high voltage. Don't think that will compete pricewise with that other one you found. I think for many of these schemes, it will be up to you to select a suitable high-voltage contactor. The lower voltage BMS of a 48V can't be used to open-circuit themselves for self-protection, can't hold off voltage of the entire pack.

4. When removing the protection board, first unplug the cable (if there are two cables, first pull out the high-voltage cable, then pull out the low-voltage cable), and then disconnect the power cable B-. IX. Wiring Precautions. 1. Software BMS connection sequence:

The livoltek BHF HV Battery System is ideal for new installation of residential energy storage system. With high energy density, high efficiency, modular stacking design and IP65 level, BHF series battery is space-saving for indoor and outdoor installation. Up to 30 kWh system can fit your high energy demand.
