Also, the sun is free, and anyone with enough land to install a solar panel system can enjoy the excellent sun's benefits. 3. Solar energy helps you save in the long run. Even though, in recent years, the costs of installing a solar panel system have decreased significantly, investment is quite expensive for many people.

It should receive sufficient sunlight and there should be no obstacles that may block the solar panel within a 5-meter radius of the site. For example, the installation site cannot be under a tree or near tall buildings, as these areas may have shadows that can affect the solar panel's charging. Avoid underground cables and drainage pipes.
