Then, boom, everything goes dark and you're left without power. A backup generator can help you restore power and stay in your home. Choosing the ideal generator for backup power can feel daunting though. Armed with the right information, you can find the perfect generator to keep your home up and running when the power goes out.

The Westinghouse WGen20000c is a nominally portable powerhouse with a wheeled frame that makes it easy to move in and out of storage. Its impressive maximum power output of 28,000 watts is enough to keep your lights on, the heat or air conditioning running, and every other power-hungry appliance and electronic device in your home until electrical service ???
